

Catalyst for Success is a non-profit organization who has the ultimate goal of instilling an early love of science in children in order to grow a new generation of scientists and engineers.

C4S hopes to reinvigorate interest in STEM education and maintain these actions in the future.

Our Mission Statement

- ◆ Today, Math and Science classes seem to revolve around only work.

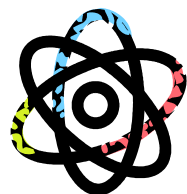

- ◆ The way the education system is structured makes it extremely difficult to teach math and science in an impactful and effective way.
- ◆ Our mission is to inspire youth to embrace STEM (Science, Technology, Engineering, and Mathematics) in education.
- ◆ The way to do this is to make it fun!

- ◆ The premise of our program focuses around the concept of a magic show.

- ◆ In this “magic show” members of our organization use basic chemical reactions to create an unique production to captivate students and have them view the excitement of science.
- ◆ As a second component to our mission to inspire a love for STEM we also plan to lead a science fair in coordination with teachers and schools.
- ◆ Students will be able to have assistance in creating

a project and build their ideas and finally view their final products with the rest of their class.

- ◆ Eventually, we would like to extend our program nationwide and potentially

set up a similar program for middle or high school students.

- ◆ We believe that science and math can be made to be fun and enjoyable for all students!
